```

g. After the client hello message has been sent, the NETCONF session is ready to process RPC messages. For example, the following XML formatted RPC message will return the ietf-interfaces model data. Please note that the returned XML data are designed to be consumed by an application. By default, this data might be difficult to for humans to read.

```
<rpc message-id="103" xmlns="urn:ietf:params:xml:ns:netconf:base:1.0">
 <get>
  <filter>
    <interfaces xmlns="urn:ietf:params:xml:ns:yang:ietf-interfaces"/>
```
